

Atollo Project

Breaking barriers
through education

Hello!

We appreciate you subscribing to the Atollo Project newsletter. Co-funded by the European Union, the Atollo Project is dedicated to supporting learners with disabilities by developing inclusive and accessible digital education tools.

In this edition, you'll find the latest news and updates on our progress. We encourage you to share this newsletter with anyone in your network who may be interested in the Atollo Project and our mission.

Thank you for your continued support!

Atollo Project successfully completes pilot testing phase

The Atollo Project has successfully completed its pilot testing phase across three countries, reaching over 100 teachers, over 200 parents, and 430 students in 15 schools. This marks a major milestone for the project, which aims to transform education for students who require adapted materials.

The Atollo Project: Inclusive education powered by IZZI

The Atollo project has been working to revolutionise how children with disabilities learn by creating engaging digital content and tools that cater to their unique needs. At the heart of Atollo's innovation is its use of the IZZI digital platform. IZZI is an innovative software suite for creating and distributing educational content, and it has served as the digital backbone for several EU-funded education projects.
